

Aloe Vera Gel

220 mL, Herbal Skin Moisturizer, Stock No. 1679-2

Aloe Vera Gel is formulated for topical, penetrating application for a variety of medicinal and first-aid-related uses. Aloe vera has been used for ages for its many healing properties. Ancient Egyptian medical writings indicate the use of aloe vera for healing infections, wounds, and skin problems.

Did you know?

Aloe vera contains proteolytic enzymes, which break down dead tissues, as well as nutrients that promote healthy cell proliferation to accelerate healing of burns and wounds.

One active ingredient in aloe vera, known as salicylate, provides both anti-inflammatory and analgesic (pain-relieving) properties. Many studies have shown aloe helps the healing of first- and second-degree burns, and also inhibits various bacteria from entering a wound.

NSP Advantage

220 mL bottle. Skin moisturizer.

Ingredients: 97.35% aloe vera (Aloe ba badensis) gel (purified water, aloe vera concentrate), 2.06% xantham (*Xanthomonus campestris*) gum, 0.35% citric acid, 0.1% potassium sorbate, 0.1% sodium benzoate, and 0.04% Carrageenan extract (from red seaweed, *Rhodophyceae spp.*). Nature's Sunshine Aloe Vera Gel is cold-stabilized and derived from pure aloe pulp.

Recommendation: Apply Aloe Vera Gel to the skin to achieve the moisturizing effect desired.

Note: The aloe used in this product has been approved by the International Aloe Science Council.
