

ART-A with Devil's Claw

100 capsules, Herbal Combination, Stock No. 798-9

ART-A with Devil's Claw is a unique combination of herbs that have enjoyed traditional use in the relief of pain associated with arthritic conditions.

This combination is used to relieve pain and inflammation in connective tissues by enhancing the body's detoxifying and digestive functions.

Did you know?

More than 50 million people suffer from various types of arthritis in North America, including osteoarthritis, rheumatoid arthritis and gout.

These conditions affect the body's movable joints. In healthy joints, the synovial membrane is thin, the cartilage that covers the bones is smooth, and a thin layer of synovial fluid covers the bone surfaces. If anything goes wrong with any of these factors, arthritis can result.

NSP Advantage

100 capsules. Herbal combination.

Ingredients: 450 mg combination of the finest bromelain (*Anana comosus*), white willow (*Salix alba*) bark, yucca (*Yucca baccata*) root, devil's claw (*Harpagophytum procumbens*) root, marshmallow (*Althea officinalis*) root, celery (*Apium graveolens*) seed, alfalfa (*Medicago sativa*) herb, capsicum (*Capsicum annuum*) fruit, yarrow (*Achillea millefolium*) flowers, burdock (*Arctium lappa*) root, nettle (*Urtica dioica*) herb, and rosemary (*Rosmarinus officinalis*) leaves.

Recommendation: Take two capsules with a meal three times daily.

CAUTION: Pregnancy & Nursing.

Features & Benefits

- May help to alleviate pain, inflammation and swelling in connective tissues by providing nutritional support to these tissues.
- Helps alleviate pain associated with inflammatory conditions and injured joints.

Traditional uses of the various herbs in the formulation include:

- White willow bark – relief of pain stemming from muscular and structural aches.
- Devil's claw – also used for pain relief, particularly in arthritic conditions. Devil's claw has traditionally been used to help treat inflammation of the joints
- Marshmallow – used for conditions of inflammation and irritation due to its demulcent and emollient properties.
- Burdock – a mucilaginous herb that has been used to alleviate rheumatic conditions.
- Rosemary has traditionally used as an adjuvant therapy for joint pain.
