

Cranberry & Buchu

100 capsules, Herbal combination, Stock No. 834-5

Cranberry & Buchu Concentrate is a specially designed herbal combination for urinary tract health and the prevention of infection in individuals prone to urinary tract infections.

Did you know?

Urinary tract infections (UTI) attack women more than men. For either sex, delaying a needed trip to the bathroom tends to raise the odds of infection. This unpleasant infection develops when bacteria travel up the urethra (urinary duct) and reach the bladder.

Anything that prevents full elimination of urine from the bladder and urethra will increase the likelihood of bacteria build-up and infection. If the infection spreads to the kidneys, serious illness can result.

Symptoms of urinary tract infection include frequent urination, with only small amounts of urine being expelled; burning or stinging pain during urination; or fever and discomfort in the lower abdomen. Occasionally, there are chills or a foul smell to the urine.

NSP Advantage

100 capsules Herbal Combination.

Ingredients: 435 mg combination of the finest cranberry powder (*Vaccinium macrocarpon*), Maltodextrin, buchu herb (*Barosma betulina*) concentrate, magnesium stearate, silicon dioxide.

Recommendation: Adults: Take one or two capsules with a meal three times daily. Children: Take one capsule with a meal twice daily.

CAUTION: Pregnancy and nursing.

Features & Benefits

- Nutritionally supports the bladder and kidneys.
- Fights and helps prevent urinary tract infections.
- Cranberry prevents infection-causing bacteria, such as *E. coli*, from adhering to the lining of the urinary tract. It has been traditionally used to help prevent recurrent urinary tract infections.
- Buchu stimulates urine flow; shrinks inflamed tissues; fights bacterial infection; and reduces water retention.
