

Crystal Clear

120 mL, Deodorant & All-Over Body Spray, Stock No. 8016-6

It's a fact that if we want to stay popular with our friends on a regular basis, we all need to use a good quality and effective deodorant. Yet many people are concerned with the ingredients in traditional deodorants and antiperspirants. Some of these ingredients have been implicated in contributing to our overall exposure to toxic chemicals, which can lead to the development of chronic diseases. In order to minimize our exposure to toxins, it is important to find personal care products that are effective and yet contain as few ingredients as possible. And of course, those ingredients must be 100% safe.

Nature's Sunshine's new Crystal Clear Deodorant & All-Over Body Spray meets this challenge admirably by providing 24-hour maximum odour protection without the use of harmful chemicals.

Did you know?

Traditional deodorants and antiperspirants use many different chemicals such as synthetic oils (can stain clothing), alcohols (can burn and irritate the skin), emulsifiers and waxes (can clog pores), perfumes (can cause severe allergic reactions) and solvents and propel-

lants (can add toxins to the environment or damage the ozone layer). Crystal Clear contains only natural mineral salts dissolved in water.

Crystal Clear stops odour-causing bacteria before they multiply on the skin's surface, rather than just temporarily masking odours as other deodorants do. Crystal Clear does not clog pores or stop the natural process of sweating, which is an important toxin-eliminating function of the body. This allows the lymph glands to function properly and help to maintain good health.

NSP Advantage

Completely non-toxic body spray and deodorant. Crystal Clear is 100% pure & natural, unscented, and is good for all skin types. The natural mineral salts in Crystal Clear are the safest and most effective deodorants available anywhere.

Ingredients: Purified water, natural mineral salts

Recommendation: After bathing, spray 4-6 times on any part of the body that produces odour. Can also be used as an after-work freshen-up.

Features & Benefits

- 24-hour maximum odour protection without harmful chemicals
- No aluminum chlorhydrates or zirconium
- No parabens
- No chemical additives
- Hypoallergenic
- No animal testing
- Non-staining
- Dries quickly
