

Echinacea, Ultimate Extract

59 mL, Liquid Herbal combination Extract, Stock No. 3181-2

Highly acclaimed as an immunity-promoting product, Ultimate Echinacea is a powerful combination of several echinacea species that stands ready like a fire extinguisher to help the body quench microbial flare-ups — and even prevent them.

Called “King of the Blood Purifiers,” echinacea benefits the lymphatic system, too. By strengthening both the immune and lymphatic systems, the blood is cleared of many encumbrances that may lead to health issues later. And echinacea does its job without side effects.

When taking Ultimate Echinacea, you are getting the best, purest and most natural concentrate on the market today.

Did you know?

Commission E, the German expert committee that judges the value of herbal medicines for the German government, has approved echinacea for treatment of influenza-like symptoms. That constitutes a significant scientific endorsement of this herb, which is native to America.

NSP Advantage

59 mL bottle. Liquid Herbal Combination Extract.

Ingredients: Contains *Echinacea purpurea*, *Echinacea angustifolia* and *Echinacea pallida* in a vegetable glycerine base.

Other ingredients: natural banana and orange flavours. Rich in echinacosides, glycoproteins, isobutylamides, and polysaccharides. Highly assimilable concentrate. Safe and effective for both adults and children.

Recommendation: Adults—Take approximately 15 to 20 drops (1 mL) in water with a meal three times daily. Children age 6 or over: Take one-half the adult dosage.

Features & Benefits

- Stimulates the immune system and strengthens the immune response against bacterial, viral and fungal infections.
- Echinacea has traditionally been used to fight off colds, flus and infections and for the relief of sore throat due to colds. It also acts as supportive therapy in the treatment of colds, flus, upper respiratory infections and urinary infections.
- Traditional uses of Echinacea among Native Americans were to treat the symptoms of colds and flu, and to promote the healing of skin wounds.
- Echinacea has been clinically studied for its ability to help reduce the duration of and severity of symptoms of colds and flu.
