

EverFlex Analgesic Cream

DIN 02247795, 56.7 g (2 oz.) Cream, Stock No. 3535-6

EverFlex Analgesic Cream is a counter-irritant with potential for anti-inflammatory and pain relieving effects. The penetrating action of EverFlex Analgesic Cream provides temporary relief of aches and pains of muscles and joints associated with backache, lumbago, strains, bruises, sprains and arthritic or rheumatic pain, pain of tendons and ligaments. It is also useful for tired, aching muscles. Its active ingredient is menthol.

Did you know?

In addition to menthol, EverFlex cream contains a proprietary blend of fatty acid esters (cetylated fatty acids), olive oil (*Olea europaea*) and methylsulfonylmethane (MSM).

Cetylated fatty acids (especially cetyl palmitate) may be good carriers for other actives and enhance their absorption through the skin.

Several investigations have suggested that olive oil can be beneficial in inflammatory and autoimmune diseases, such as rheumatoid arthritis.

MSM is a source of sulfur, an important structural component of the connective tissue that joins muscles to bones. Some studies have shown MSM to have pain reducing and anti-inflammatory properties.

NSP Advantage

Analgesic cream. 56.7 g (2 oz.).

Active Ingredient: Menthol 1.25%

Other Ingredients: Water, glyceryl stearate, glycerin, cetyl myristoleate, cetyl myristate, olive (*Olea europaea*) fruit oil, methylsulfonylmethane (MSM), lecithin, tocopheryl acetate, benzyl alcohol, phenoxyethanol, carbomer, PEG-100 stearate, potassium hydroxide, cetyl palmitate, cetyl palmitoleate, cetyloleate, cetyl laurate, methylparaben, propylparaben, ethylparaben, butylparaben, isobutylparaben.
