

GlucoReg

60 capsules, Herbal Combination, Stock No. 927-1

More than 2 million Canadians have diabetes. The number is expected to rise to more than 3 million by the end of 2010. Diabetes is a chronic disease that has no cure. It is a leading cause of death in Canada, being a contributing factor in the deaths of approximately 41,500 Canadians each year. Canadian adults with diabetes are twice as likely to die prematurely, compared to persons without diabetes. Of those with diabetes, 90% have Type II (Adult Onset) Diabetes. Type II is quite treatable but requires daily attention to good health.

GlucoReg provides nutrients that may help support the body's efforts to regulate blood sugar levels. Only Nature's Sunshine offers this unique combination that works naturally to promote healthy blood sugar levels while providing antioxidant and protective nutrients that guard against damage that is often associated with abnormal blood sugar levels. GlucoReg is the result of years of research and testing.

Did you know?

Scientists believe that lifestyle and Type II diabetes are closely linked. This means that lifestyle is one area individuals can focus on to help prevent or delay the onset of the con-

dition. A healthy meal plan, weight control, physical activity and stress reduction are important prevention steps.

NSP Advantage

60 capsules Herbal combination to help the body regulate blood sugar levels.

Ingredients: Each capsule contains a blend of 491 mg of the following:

Medicinal Ingredients: Nopal (*Opuntia streptacantha*) leaves 200 mg; Fenugreek (*Trigonella foenum-graecum*) seeds 110 mg; Bitter Melon (*Momordica charantia*) fruit 83 mg; Gymnema (*Gymnema sylvestre*) leaf extract 67 mg; standardized Banaba (*Lagerstroemia speciosa*) leaf extract 16 mg; chromium (amino acid chelate) 250 mcg; vanadium (amino acid chelate) 12.5 mcg

Non-medicinal ingredients: gelatin capsule

Recommendation: Take orally one capsule three times daily with a meal.

Risk Information: Do not use if you are pregnant or breastfeeding. Not recommended for children (consult a health care provider). Consult a health care provider if you have renal insufficiency or liver disease. Monitor blood glucose closely if taking diabetic or hypoglycemic drugs and insulin concurrently.

Features & Benefits

- Helps the body to regulate blood sugar levels.
- Fenugreek has been traditionally used to treat a wide variety of digestive and intestinal complaints. Its ability to aid the digestion process allows for support of normal blood sugar levels.
- Nopal provides needed nutrients to the liver and aids in digestion. It has a well-documented history of helping the body maintain acceptable blood sugar levels.
- Banaba Leaf, Gymnema and Bitter Melon all provide nutrients that support the healthy function of the glandular system, particularly the pancreas.
- Chromium, an important trace mineral, is essential for healthy blood sugar levels. It helps insulin get into the cell. A deficiency in chromium can result in high blood sugar.
- Vanadium may help the body control blood sugar because it mimics the activity of insulin.
