

Maca (Peruvian ginseng)

90 capsules, Single herb, Stock No. 1117-2

Maca, a rainforest herb that is a member of the radish family, grows in the Andes mountains of South America and may provide a natural means for improving sexual desire and performance. Also known as Peruvian ginseng, maca is nutritive, tonic, adaptogenic, and aphrodisiac.

Did you know?

Statistical reports suggest that one in 3 men in North America between the ages of 18 and 59 years experience dissatisfaction with some aspects of sexual function and performance. Women express equal dissatisfaction.

Animal studies show that maca supports improvement in male subjects with erectile performance issues.
