

Men's Formula

DIN 02198754, 60 capsules, Mineral/Herbal combination, Stock No. 3111-3

Men's Formula is a unique blend of nutrients that have been identified in scientific studies to benefit prostate health.

This powerful blend of concentrated, standardized herbal extracts is combined with zinc, an essential mineral for a healthy prostate gland.

Men's Formula is considered particularly beneficial for men over 40 prone to prostate problems.

Did you know?

Benign prostatic hypertrophy (BPH), better known as enlarged prostate, is considered to be caused by testosterone accumulating in the prostate. The testosterone is then converted to dihydrotestosterone (DHT), which causes the cells to multiply too quickly and leads to enlargement of the prostate. The saw palmetto concentrate in Men's Formula prevents testosterone from converting to dihydrotestosterone.

We know that DHT kills off the hair follicles and the herbs in Men's Formula block the formation of DHT.

NSP Advantage

60 capsules. A standardized potency. Mineral/Herbal combination.

Ingredients: Each capsule contains 5 mg of zinc (gluconate) and 208 mg of saw palmetto (*Serenoa repens*) concentrated extract standardized at 20% essential fatty acids.

Other Ingredients: Ginkgo leaves (*Ginkgo biloba*) powder, stinging nettle (*Urtica dioica*) concentrated extract standardized to 2% plant silica.

Recommendation: Take three capsules with breakfast and two capsules with your evening meal daily.

Features & Benefits

- Saw palmetto has been used to help relieve symptoms of BPH such as swelling, pain or difficulty urinating.
- May help relieve excessive urination or difficulty in stopping urination due to enlarged prostate.
- Saw palmetto has traditionally been used to prevent and treat enlargement of the prostate.
