

Protein Digestive Aid

DIN 00486035, 200 tablets, Digestive enzyme supplement, Stock No. 1756-2

Protein Digestive Aid supplements the body's own digestive secretions. It is designed to help individuals break down and better digest proteins.

Did you know?

As people age, they usually produce less hydrochloric acid, which affects the amount of protein they can absorb, leading to a host of digestive problems, as well as possibly compromising the immune system. Undigested proteins have been shown to contribute to asthma, allergies and food sensitivities, as these substances can activate allergic reactions which cause the release of histamines.

NSP Advantage

200 tablets. Enzyme supplement.

Ingredients: 65 mg of pepsin, a natural source of protein digestive enzyme, in a base of betaine hydrochloride (325 mg).

Other Ingredients: Dicalcium phosphate, cellulose, stearic acid, magnesium stearate.

Recommendation: Take one to four tablets with a meal three times daily. Swallow tablets whole; do not chew or dissolve before swallowing.

CAUTION: Keep out of reach of children.

Features & Benefits

- Helps digest proteins and assists absorption of nutrients.
- Betain (hydrochloric acid) helps break down protein.
- Pepsin predigests protein in the acidic environment of the stomach.
- Destroys harmful bacteria which may be ingested from food.
- May relieve asthma, allergies, and food sensitivities.
