

Nature's SilverGuard with Aqua Sol Technology

Mouthwash, 118 mL, Stock No. 4276-4; 473 mL, Stock No. 4277-0

Silver compounds have been used medically for centuries. Greek and Roman societies stored liquids in silver-lined containers to keep them fresh. American settlers traveling west would put a silver dollar in milk to delay its spoiling.

Did you know?

The use of silver as medicine was widespread until World War II when antibiotics became the standard treatment for infections.

However, due to overuse, many pathogenic organisms are becoming resistant to antibiotics. Recently, silver has been reintroduced as a natural alternative to fight bacterial infections at early stages of illness.

Research indicates that Silver (with Aqua Sol Technology) is an effective immune system booster, discouraging the growth of unwanted invaders. SilverGuard is an effective alternative to other products on the market.

NSP Advantage

SilverGuard disables the specific enzyme that many unwanted microorganisms need to metabolize oxygen (breathe). When this enzyme becomes disabled, the microorganisms cannot thrive. Silver Sol has been effective against unwanted microorganisms when tested in *vitro*.

SilverGuard uses only the finest particle-size colloids to ensure maximum efficiency. It is completely non-toxic and is free of heavy metal contamination.

Ingredients: Aqua (deionized water), silver. Each teaspoon (5 mL) provides 90 mcg of pure silver in colloidal form (colloidal silver solution, 18 ppm).

Recommendation: Swish one teaspoon of Nature's SilverGuard in the mouth for 30 seconds three times a day. Safe to swallow.

Features & Benefits

- Helps eliminate odour-causing bacteria.
- Silver has traditionally been used for acne, ear infections, eczema, herpes, shingles, sinus infections, colds, flu, measles, epilepsy, tonsillitis, tetanus, rheumatism, and wounds.
