

Uva Ursi

DIN 02230412, 100 capsules, Traditional herbal diuretic, Stock No. 710-9

Uva ursi has a strong affinity for the urinary system.

It has been used as a diuretic and urinary antiseptic for more than 1,000 years by cultures as widely separated as the Chinese and North American natives.

Today this astringent herb is an ingredient in most herbal diuretics and urinary remedies and many weight-loss formulas.

Did you know?

The Roman physician Galen used uva ursi's astringent leaves to treat wounds and stop bleeding. But Western herbalists largely ignored this herb until the 13th century, when Marco Polo reported Chinese physicians using it as a diuretic to treat kidney and urinary problems.

NSP Advantage

100 capsules. Single herb. Traditional Herbal Diuretic.

Ingredients: Uva ursi (*Arctostaphylos uva-ursi*) leaf. Uva ursi contains naturally-occurring amounts of calcium, iron, manganese, selenium, silicon, and vitamin A.
