

Yeast/Fungal Detox

90 capsules, Herbal Combination, Stock No. 508-9

A healthy body is host to a delicate balance of friendly microflora. For example, the mucous membranes of the mouth, sinuses, lungs, intestines, uterus and vagina are lined with protective bacteria. These body tissues are attacked by yeast and fungus when the bacteria are killed, or their balance compromised through various factors such as poor diet and some prescription medications. Excesses of yeast and fungus can compromise the immune, digestive and urinary systems.

Did you know?

Yeast infection is a parasitic problem that afflicts both humans and animals. Conditions of warmth and humidity favor the growth of yeast. The skin, oral cavity, toes nails, the gastrointestinal tract and the vagina are the most vulnerable sites for yeast overgrowth. Yeast/Fungal Detox is a potent detoxification product formulated to inhibit the growth of unfriendly organisms and help restore the body to optimal performance.

NSP Advantage

90 capsules. Herbal Combination.

Yeast/Fungal Detox is a special blend of herbs and nutrients that inhibits the growth of unfriendly organisms while building up the body systems that have been affected. It supports the immune, digestive and urinary systems to promote optimal health.
